OSAMA KHALIL

DevOps Engineer | Azure | Terraform | CI/CD | Linux

New Delhi, India | +91-9430088343 | khalil.osama91@gmail.com | [LinkedIn URL]

PROFESSIONAL SUMMARY

DevOps Engineer with 11 years of total experience, including 6 years in DevOps and Linux administration and a strong telecom/networking foundation. Skilled in building and automating Azure infrastructure with Terraform, Git-based workflows and CI/CD pipelines. Combines hands-on infrastructure-as-code delivery with deep network knowledge (TCP/IP, DNS, routing, 4G/5G) to build reliable, secure and repeatable cloud platforms.

CORE SKILLS

Cloud	Microsoft Azure (VNet, Subnets, NSG, VMs, Storage, Key Vault, Azure Monitor), Azure Landing Zone concepts, Azure Database for PostgreSQL
Infrastructure as Code	Terraform (modules, remote state on Azure Storage, workspaces, variables/outputs), tflint, Checkov, tfsec
CI/CD & Version Control	Git, GitHub, GitHub Actions, Azure DevOps Pipelines, branching strategies, pull-request workflows
Linux & Scripting	Linux administration (RHEL/Ubuntu), systemd, SSH, Bash, Python, YAML, Nginx
Monitoring & Security	Prometheus, Azure Monitor, RBAC, secrets management, shift-left IaC security scanning
Automation & Tools	Ansible, Power Automate, JIRA, Confluence
Networking & Telecom	TCP/IP, DNS, VLAN, routing, firewalls, 4G/5G RAN and core concepts, NOC/BSS operations

PROFESSIONAL EXPERIENCE

Senior Engineer – DevOps *Dec 2021 – Present*

Ericsson India Global Services Pvt. Ltd., Gurgaon

- Designed, provisioned, and maintained Azure cloud infrastructure using Terraform with reusable modules and remote state management, enabling consistent and repeatable environments across Dev, Stage, and Prod.
- Managed Git-based source control and code review workflows; automated build, validation, and deployment processes through CI/CD pipelines using Azure DevOps and GitHub Actions.
- Administered and troubleshot enterprise Linux servers (RHEL/Ubuntu), including performance tuning, OS patching, user and access management (SSH/RBAC), and network diagnostics.
- Automated recurring engineering and operations tasks using Bash scripting and Power Automate, reducing manual effort and improving turnaround time for routine maintenance activities.
- Collaborated with cross-functional teams, tracked delivery progress in JIRA, and applied security and compliance checks (Checkov/tfsec) to infrastructure-as-code.

Network Engineer (Linux) – Project *Mar 2021 – Oct 2021*

Emerald Telecom Pvt. Ltd.

- Configured and administered Linux-based network servers and gateways, managing IP routing, firewall rules (iptables), and interface bonding to maintain high network availability.
- Performed end-to-end connectivity troubleshooting and deep-packet diagnostics using tcpdump and Wireshark to resolve critical network bottlenecks between on-premises systems and telecom interfaces.
- Created and maintained network configuration documentation, including system baselines, firewall policies, and change records for operational consistency.

Telecom Implementation Engineer (Africa Region) *Feb 2017 – Oct 2020*

Engicell Technology Ltd. – Airtel / Huawei projects: Zambia, Kenya, Malawi & Namibia

- Delivered network implementation and integration for Airtel across four African countries on Huawei platforms.
- Performed commissioning, testing, optimization and fault resolution, coordinating with customer and vendor teams on site and remotely.
- Configured systems and integrated new equipment into live networks; supported new cell-site turn-up, integration and optimization.

BTS Engineer (NOC / BSS) *Mar 2016 – Jan 2017*

Universal Telecom Pvt. Ltd., Bihar Circle

- Monitored and maintained the network from the NOC, handling alarms, incident resolution and BSS-related operations.
- Performed first-level troubleshooting of Base Station Subsystem (BSS) issues, escalating complex problems to higher support teams with clear incident documentation.
- Maintained accurate incident logs and shift handover reports to ensure continuous operational visibility across NOC teams.

Site Engineer (Field) *Oct 2013 – Jan 2016*

Nutek India Pvt. Ltd.

- Executed field installation, commissioning and maintenance of telecom site infrastructure.
- Performed BTS and microwave integration, commissioning and troubleshooting activities.
- Performed testing, commissioning and integration of Nokia ODU/IDU equipment, including FIU, FXC RRI and FXC E1/T1. Integrated Nokia SRAT/ULTRA EDGE BTS and microwave links.
- Conducted VSWR testing, call testing, alarm verification and fault rectification; supported SAT procedures during installation and commissioning.

PROJECTS

Telecom Network Management System (NMS) on Azure

Azure | Terraform | Azure DevOps | Linux | FastAPI | PostgreSQL | Nginx | Git

- Deployed a telecom Network Management System (NMS) on Azure, provisioning VNet, subnets, Linux VM and PostgreSQL using Terraform (IaC).
- Built Azure DevOps CI/CD pipelines for automated deployment of the FastAPI application behind Nginx, with private connectivity to PostgreSQL and the frontend on an Azure Storage static website.
- Managed source code with Git feature branches, Pull Requests and branch policies.

EDUCATION

- **Post Graduate Program in Cloud Computing —** Great Lakes Executive Learning, New Delhi | Oct 2024
- **B. Tech, Electronics & Communication Engineering —** Maharishi Dayanand University, Faridabad | 2008 – 2012
